Providing DAT services

Secondary Market Fund Solutions

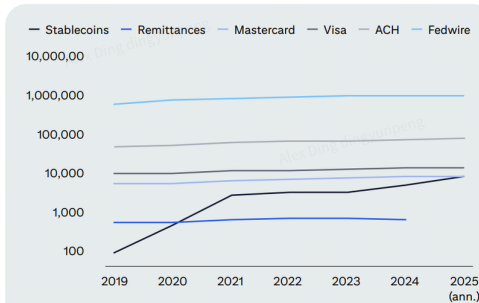

A New Era of Payments: New Economic Forces Are Reshaping Global Trade

Stablecoin payments are not just an alternative — they are a new engine driving trade growth.

Explosive Growth of the

Figure 5. Stablecoin Transaction Volume vs Other Modes (\$ Billion)

Note: Logarithmic scale.

Source: Fedwire, ACH, Mastercard, Visa, Allium, World Bank, Citi Institute

As global regulations become clearer, the stablecoin market has grown rapidly over the past 2 years. Stablecoin volume used for actual payments reached USD 1.3T by mid-2025 (Visa: USD 15.7T, Mastercard: USD 9.8T), becoming an emerging cross-border settlement tool with continued rapid growth.

Reaching New Customer Segments

560M

By supporting digital currency payments, you can reach over 560M crypto holders worldwide — a young, high-net-worth Web3-native consumer base.

Mainstreaming

stripe

Trend

Web2 payment giants (e.g., Stripe) have entered stablecoin payments, signaling crypto payments are shifting from a niche tool to a business standard. In late 2024, Stripe acquired a crypto payment company for USD 1.1B; in 2025, Stripe revenue grew 34% YoY.

HP2-More Efficient On-Chain Payments

Feature	HP2	Credit Card	PayPal	Ethereum L1
Avg. Fee	< 1%	1.5-3%	~ 3%	Gas: \$1-\$10
Settlement Finality	~ 2 sec	~ Days (Batch Processing)	Instant Auth., Days for Net Settlement	~ 1-2 min confirmation
Chargebacks/ Disputes	In Progress	Supported, Up to 120 days	Supported	Irreversible
Scalability (TPS)	Thousands of TPS	Global 24K TPS	Varies; subject to account/PSP limitations	~ 15-20 TPS

The Challenge of Embracing Opportunity: The Merchant's Impossible Triangle

Current payment solutions force merchants to make painful trade-offs among efficiency, compliance, and UX — unable to achieve all three.

Path 1: Traditional Banking (SWIFT)

Pain Point: T+3 settlement, high FX losses and intermediary fees, unable to support high-frequency transactions.

Efficiency & Cost

Compliance &
Security

User
Experience

Path 2: Existing Crypto Payments

Compliance Black Box: On-chain hashes are difficult to use as accounting records, creating audit challenges.

Financial Barrier: On-chain hashes are difficult to use as accounting records, creating audit challenges.

Fragmented Experience: Merchants struggle to quickly convert digital assets into fiat.

HashKey Stablecoin Payment Solution

Combining the speed and cost advantages of crypto with the security and compliance of traditional finance.

Ultra-Fast Efficiency & Cost

Based on the HP2 protocol and blockchain network, achieving T+0 settlement in seconds. Utilizing stablecoin settlement to eliminate FX volatility, reducing ~90% cross-border transfer costs.

Addressing Pain Point: Solving traditional banking's "**Too Slow, Too Expensive**"

Bank-Grade Compliance & Risk Control

On-chain AML Combined with pre-transaction auto-scanning to intercept high-risk addresses. Providing fund trail proof for every transaction to meet audit requirements.

Addressing Pain Point: Solving crypto payment's "**Compliance Black Box**" and "**Financial Nightmare**"

Seamless User Experience

Providing a plug-and-play checkout SDK that maintains the original payment experience while supporting seamless fiat on/off-ramp.

Addressing Pain Point: Solving user experience's "**Fragmentation Issue**"

Dual-Layer Product Architecture for Robust Business Operations

CaaS Service Module (Compliant Fund Layer)

HashKey Custody: Enterprise-Grade Custody Wallet for Secure Asset Protection

HashKey OTC: Fiat Conversion Channel Connected to Banking, Completing the Last Mile

HP2 Protocol (Channel Layer)

Function: Standardized Transmission of Payment Instructions

Core Feature 1: Mandate (Authorization)

Supporting future automated debit and subscription payments

Core Feature 2: Receipt (Voucher)

On-chain interactions generate tamper-proof electronic receipts

Core Feature 3: On-Chain AML & Privacy Transactions

Real-time screening to block high-risk transactions

Payment Mode A: Direct Settlement

Suitable for: Web3-native merchants and independent sites that prefer self-managed assets.

Decentralized: Funds bypass the platform, delivered peer-to-peer

Zero Fund Retention: Platform never touches funds, only provides a technical channel

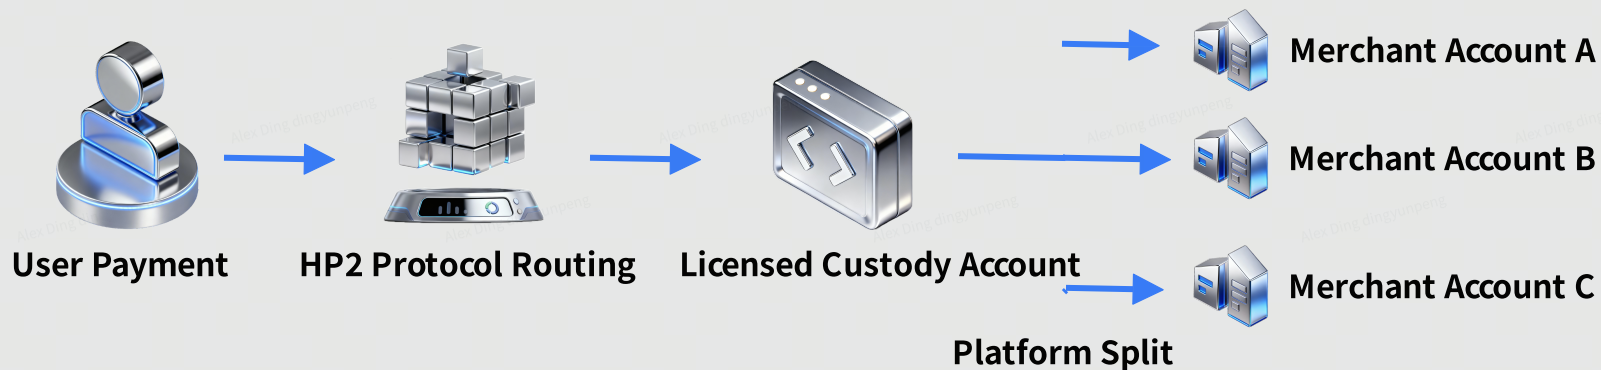

Instant Settlement: No intermediaries, achieving the fastest path

Compliance Highlights

In Direct Settlement mode, the protocol provides KYT (Know Your Transaction) on-chain monitoring, proactively reducing the risk of merchants receiving illicit funds

Payment Mode B: Two-Tier Settlement (Integrated Settlement)

Suitable for: E-commerce platforms, matchmaking markets, and enterprises requiring unified fund control.

Unified Aggregation: Facilitating platform fund management and reconciliation.

Automated Revenue Sharing: Smart contract-based auto commission deduction and revenue distribution.

Compliant Segregation: Client funds strictly segregated from platform operating funds, custodied by a licensed institution.

Compliance Highlights

In Direct Settlement mode, the protocol provides KYT (Know Your Transaction) on-chain monitoring, proactively reducing the risk of merchants receiving illicit funds

Tailored to Your Business Model: Flexible OTC Fund Channels

Regardless of settlement mode, fiat channels can be configured on demand.

Config I: Crypto-Only Settlement

Crypto Native

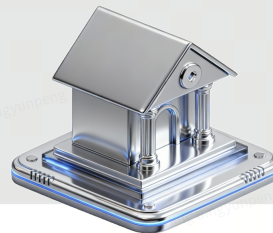

Receive payments in USDC / USDT
Directly used for on-chain
payments to suppliers or
employees.

Config II: Merchant Self-Withdrawal

Manual Off-Ramp

After merchant withdrawal, via HashKey
OTC portal self-convert to USD / HKD
and withdraw to bank account

Config III: Automated Fiat Settlement

Automated Off-Ramp

System can auto-trigger OTC conversion
based on set thresholds, settling fiat
directly to the merchant (customization
required)

HashKey Ecosystem

Payment Technology

Global Compliance License Footprint

HashKey Group: Licensed or exempt across Hong Kong, Singapore, Tokyo, the EU, and the UAE (MENA).

Allinpay: Licensed cross-border payment provider with licenses in Mainland China, Hong Kong, and Singapore; core member of major card networks (Visa, Mastercard, Amex, Discover, JCB, UnionPay International) with independent international card processing capabilities.
